

YOUR ADVANTAGES AT A GLANCE

ZF-Ecofluid Life Plus allows you to benefit from a variety of advantages:

- Specially developed for ZF-EcoLife transmissions
- Fuel savings of up to 1.5% compared to mineral transmission oils
- Extended oil change intervals leading to less downtime and lower maintenance costs
- Higher operating temperatures of up to 120 °C
- Effective protection of all transmission components leading to a long transmission service life
- Recommended for challenging topographical conditions, stop-and-go traffic, frequent cold starts, and retarder operation
- Highly flexible temperature behavior
- Optimum shifting comfort
- Excellent stability
- Always state of the art

MOTION AND MOBILITY

FUEL-SAVING

The favored oil for ZF-EcoLife transmissions

ZF-ECOFLUID
Life Plus

40283 EN

THE TEMPERATURE-STABLE FUEL-SAVING OIL

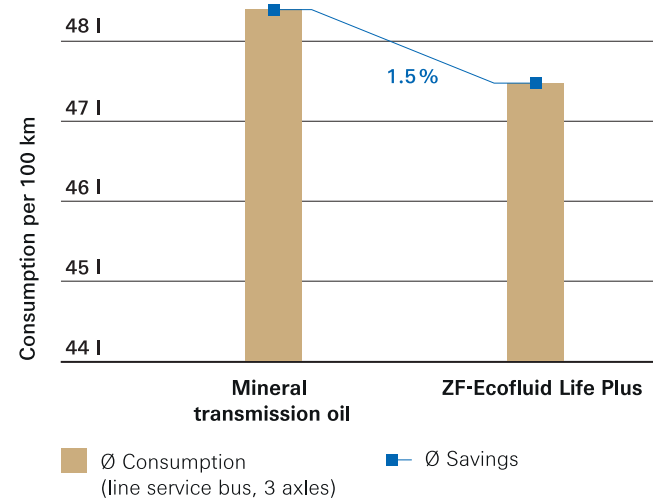

ZF-Ecofluid Life Plus is the optimized transmission oil for modern ZF-EcoLife transmissions. It was specially developed as a particularly fuel-saving and temperature-stable low-viscosity oil for this transmission type. Thanks to continuous quality assurance and further development, ZF-Ecofluid Life Plus is always state of the art and thus effectively protects the ZF-EcoLife transmission from wear.

Mixed fleets	ZF-Ecofluid A Life , the strong universal oil for ZF-Ecomat and ZF-EcoLife transmissions
ZF-EcoLife fleets	ZF-Ecofluid Life Plus , the special oil for ZF-EcoLife transmissions which excels thanks to particularly high fuel savings

ECONOMICAL AND ENVIRONMENTALLY FRIENDLY

Compared to mineral transmission oils, ZF-Ecofluid Life Plus generates fuel savings of up to 1.5%. This makes it economical and environmentally friendly. Depending on actual vehicle application, even higher fuel savings can be achieved.

CONVINCING PRODUCT CHARACTERISTICS

ZF-Ecofluid Life Plus has more to offer than conventional transmission oils.

Lower operating costs – extended oil change intervals

The exceptional stability of ZF-Ecofluid Life Plus makes extended oil change intervals possible. This helps effectively save oil, oil filters, and working time.

Higher operating temperatures

Thanks to improved oxidation stability and constant friction characteristics, ZF-Ecofluid Life Plus is suited for higher operating temperatures of up to 120°C.

Optimum shifting comfort and a long service life

ZF-Ecofluid Life Plus is a high-performance oil specially developed for city buses and coaches with characteristics optimally adapted to increase shifting comfort and extend service life. The oil is designed for high loads – such as challenging topographical conditions, stop-and-go traffic, frequent cold starts, and retarder operation.
