

YOUR BENEFITS AT A GLANCE

ZF-Ecofluid M provides numerous benefits compared to other CV transmission oils for manual and automatic transmissions.

ZF-Ecofluid M means:

- optimal protection from wear
- superior shifting comfort
- perfect viscosity
- optimal frictional properties
- temperature resistance
- oxidation and aging stability
- reliability in all climatic zones
- low environmental impact

Your benefits:

- longer transmission service life
- reduced fuel consumption
- improved shifting comfort
- less frequent transmission oil changes
- less downtimes
- fewer service costs

40271 EN

PERFECT PROTECTION AND OPTIMAL PERFORMANCE

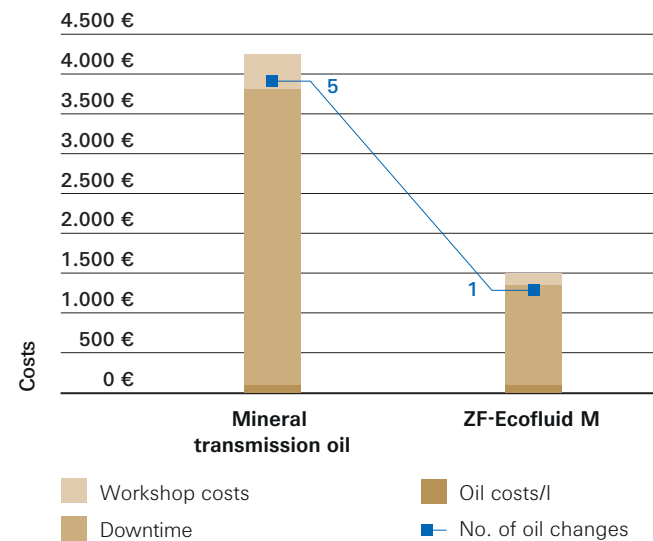

ZF-Ecofluid M is the top high-performance oil in the commercial vehicle sector. It prevents premature wear and guarantees that ZF manual and automatic transmissions operate optimally.

At ZF, the development of transmissions and development of transmission oils go hand in hand. This is why ZF-Ecofluid M is exactly tailored to the requirements of ZF transmissions for commercial vehicles and represents state-of-the-art technology. Quality assurance and continuous further development are top priority. Trucks, buses, light commercial vehicles, and vans are assured on-the-road safety with ZF-Ecofluid M.

DISTINCTLY MORE ECONOMICAL THAN CONVENTIONAL OILS

ZF-Ecofluid M is considerably more effective than conventional transmission oils. This cost-effective advantage is demonstrated in a direct comparison example of one million km vehicle miles travelled.

THE NUMBER ONE IN THE COMMERCIAL VEHICLES SECTOR

ZF-Ecofluid M is the winner in all points that are important in the commercial vehicle sector.

More performance – less consumption

With ZF-Ecofluid M, vehicle performance increases as fuel consumption simultaneously falls. Up to 1% in savings are achieved compared to mineral transmission oils.

Less frequent changes – avoid downtimes

Oil changes are much less frequent with ZF-Ecofluid M than with conventional transmission oils, namely only every 540 000 km or every three years. This helps protect the environment and saves money.

Superior shifting comfort

The smooth-running property of our innovative transmission oil enables effortless cold starts and guarantees frictionless shifting in all temperature ranges.
